

# Let's Face It

## Verse 1

Let's face it, I am the problem  
I rather blame all these faces Although it's so blatant  
That I am always right and always justified  
It's time for me to own it  
I don't know how to take it  
When facing other people who think differently  
So I pick a fight or just choose to stay afar

## Chorus:

One new song, one new story, one new life  
I am changing my ways, I am changing my ways today  
One new song, one new story  
Change is on its way  
Love is on its way today I swear

## Verse 2

It's amazing, how much energy  
I spend on judging others because I am insecure  
So I use my pride as a shield and hide behind

## Bridge

Hypocrite, I don't want to be a hypocrite  
Screaming out world peace  
But in my life, spreading hatred.

## Verse 3

It is decided, today is a new day  
Though I know we will disagree I am not going to violate your dignity  
Because I choose to love you  
Oh Yes, I choose to love you!
